

MATTHEW PROCTOR

2026

THE PROC MARK is the primary identifier of designer Matthew Proctor. Developed as a personal brand mark, the symbol represents growth through creativity, serving as a visual signature across print, digital, and interactive media.

Constructed from a series of ascending geometric forms, the mark draws inspiration from urban architecture and evolving city skylines. Each shape rises above the last, creating a sense of upward progression and momentum. Its forward-leaning structure reinforces movement, suggesting continuous development rather than a fixed destination.

Minimal in form yet deliberate in execution, the Proc Mark reflects a belief that meaningful progress is built over time through discipline, learning, and creative refinement. Today, it stands as a symbol of craftsmanship, adaptability, and the pursuit of what's next.

FIRST INTRODUCED IN 2026. STILL BUILDING.

PROFILE

Skilled professional known for creative problem-solving, execution, and collaborative support across administrative, branding, and design projects.

SKILLS

- Project Management
- Team Leadership
- Collaboration
- Research
- Design & Layout
- A.I Workflows
- HTML/CSS
- Typography
- Branding & Identity
- Print & Digital Design
- Web Layout

SOFTWARE

- Adobe Photoshop
- Adobe Illustrator
- Adobe Indesign
- Adobe After Effects
- Adobe XD
- Framer
- Figma
- Visual Code Studio
- CapCut

EDUCATION

Tarrant County College I
2023 - 2026

Associates of
Graphic Communication

- Phi Theta Kappa
Honor Society

WORK HISTORY

HELP DESK AGENT I 2021 - Current

Velera Financial Services

- Supervises functional teams within the department, providing leadership to direct reports while ensuring client service and quality standards are met.
- Acts as Subject Matter Expert (SME) for changes/updates in processing platform systems.
- Regularly conducts individual staff meetings to keep direct reports informed on current processes and team progress.
- Provides feedback and coaching to staff regarding their performance.
- Adhere to compliance procedures and internal/operational risk controls in accordance with all applicable regulatory standards, requirements, and policies.

WAREHOUSE SPECIALIST | 2018 - 2021

Amazon Warehouse

BARTENDER I 2015 - 2018

Chuy's Tex Mex
On The Border
TGI Fridays

DIRECTIONAL SLICE COMPOSITION

This piece was constructed entirely within Adobe Photoshop and explores controlled composition through fragmentation and structured negative space. The subject is divided using custom vector masks, with angled slices that create directional movement inspired by sword strikes. Subtle drop shadows and layered depth separate each panel, creating a sense of dimension while maintaining clarity. UI-inspired graphic elements and typography reinforce a system-based aesthetic rooted in precision and discipline. The result is a technically driven study in motion, balance, and visual control.

Original Photo

SOUTHERN HILLS REALTY PROTOTYPE

This project explored responsive web design and UI/UX prototyping & layout through the creation of a mock real estate website for Southern Hills Realty. Designed in Adobe XD, the study focused on accessibility, responsive layout systems, navigation structure, and client-centered user experience across desktop and mobile platforms.

SEPHIROTH: INTERACTIVE WEB GUIDE

■ This project explores the development of a webpage utilizing HTML5 and CSS spreadsheets. Designed as an immersive single-page experience, the site combines atmospheric typography, embedded media, anchored navigation, and layered visual composition to create a dramatic user guide centered around an iconic video game character known as Sephiroth.

PROJECT FOCUS

- ◆ Semantic HTML structure
- ◆ Custom CSS styling systems
- ◆ Embedded multimedia integration
- ◆ Long-form scrolling presentation
- ◆ Atmospheric UI composition
- ◆ Typography and spacing hierarchy
- ◆ GitHub pages deployment

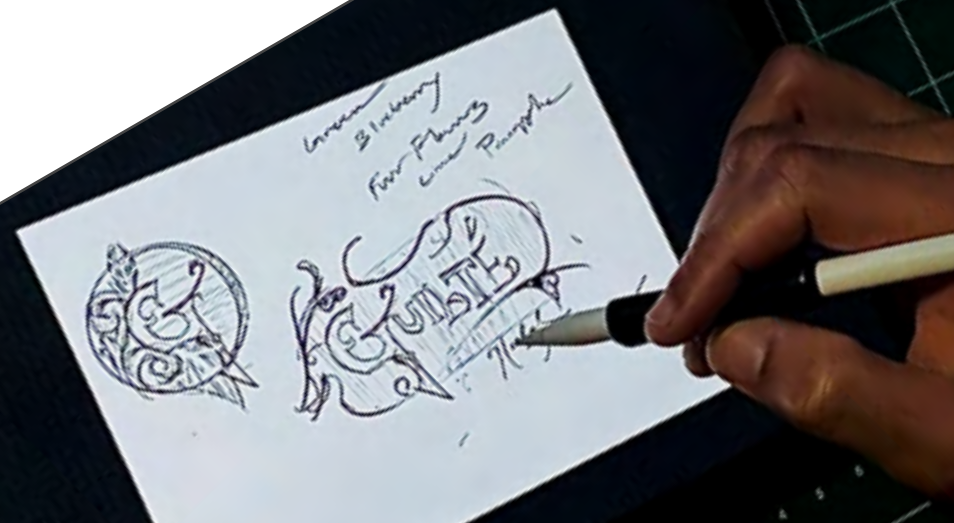

DESIGN APPROACH

This project was developed as a front-end web study focused on building familiarity with HTML5, CSS, accessibility standards, and responsive layout design. Inspired by entertainment websites like IGN and GameSpot, the microsite combines structured content, embedded media, anchored navigation, and cinematic presentation techniques to create an engaging experience.

GUILTÉ – TEA LABEL SYSTEM

This label system was created for Guilté, a sparkling botanical tea brand centered around confident, responsible indulgence. The design combines ornate, apothecary-inspired typography with a clean, structured layout to create a refined yet approachable identity. Four flavor variations—Lavender Blueberry, Rose Hibiscus, Chamomile Honey, and Sage Citrus—were developed within a consistent framework, using subtle color and botanical shifts to maintain cohesion while allowing differentiation.

SIEMPRÉ TÉ – AD COMPOSITION

This advertisement expands upon the Guilté brand further. The composition features four cans representing different flavors, arranged in motion to emphasize energy and refreshment. Colorful brush strokes and splash effects add movement and visual rhythm, guiding attention toward the product. Designed as a vertical poster-style ad, the piece focuses on strong product visibility and a bold layout suitable for social media or urban poster placement.

Original Sketches 2

GUILTÉ – MEDIA CAMPAIGN

This series explores the Guilté brand across social media ads, mobile campaigns, billboards, and urban displays. The mock ups were developed using AI-assisted image generation and refined through digital compositing and brand direction. The campaign demonstrates cross-platform consistency, bold visual storytelling, and modern beverage branding through expressive typography, vibrant color systems, and environmental advertising applications.

INSTAGRAM REEL

A high--energy social media reel constructed from stock imagery to showcase the strength, performance, and aggressive aesthetic of vehicles in motion. The video combines AI-assisted motion generation with dynamic editing to deliver a bold, attention grabbing campaign built for the automotive lifestyle and performance market. A custom company logo animation was created and included to simulate advertising with real-world application.

2026 GRADUATE POSTER

This poster promotes the 2026 Graduate Showcase presented by TCC Graphic Communication. The composition merges a stylized portrait with floral elements and a graduation cap, symbolizing growth, transition, and achievement. Oversized typography overlaps the imagery, creating a layered, editorial aesthetic that emphasizes hierarchy and visual impact. A soft watercolor background with contrasting pink and blue tones establishes movement and depth, while structured typographic columns organize event details and participant information. The layout balances expressive collage techniques with controlled grid alignment, resulting in a contemporary poster design suited for both print display and promotional use.

HISTOLAB SKIN CARE

This branded composition for Histolab, a mock skincare company, features a split-portrait visual divided by a vertical rule to present clear before-and-after treatment results. The left side of the face remains untouched, while the right is refined through non-destructive Photoshop workflows including precision masking, healing and clone tools, tonal correction, blending modes, and smart filters—framing the transformation within a clean typographic system that reinforces Histolab’s results-driven identity.

MT. YASUR BROCHURE

This brochure presents Mount Yasur through a structured, editorial layout that organizes dense geological information into a clear visual system. Diagrams, iconography, and labeled sections break down volcanic activity, eruption types, and tectonic context, while typographic hierarchy and grid alignment guide the viewer through the content. The piece focuses on translating complex subject matter into an accessible, cohesive format.

DUSK JACKET

This project involved designing a full-wrap book cover for The Hound of the Baskervilles--written by Sir Arthur Conan Doyle. This cover combines illustration, typography, and layout into a cohesive narrative-driven composition. Created with a focus on mood and symbolism, the design interprets key themes of mystery, dread, and pursuit through simplified forms, restrained color, and visual hierarchy. The final piece demonstrates an integrated approach to concept development, illustration, and publication-ready design.

MENU DESIGN: MAMA BELLA

This project presents a full menu design for Mama Bella, a neighborhood-style restaurant centered on comfort food and familiar flavors. The layout uses a paragraph-style format to create a modern, streamlined reading experience while maintaining the warmth and approachability of a traditional dining menu. Clear typographic hierarchy and structured sections guide the viewer through appetizers, burgers, steaks, and desserts with ease. The visual system reflects the restaurant’s identity through balanced spacing, bold headings, and cohesive styling, resulting in a functional and brand-driven piece designed for both print and in-restaurant use.
